CALL FOR PARTICIPATION
2000 International Symposium on Memory Management
(ISMM)
Sponsored by ACM SIGPLAN

Minneapolis, Minnesota, October 15–16, 2000
(in conjunction with OOPSLA 2000)
http://www.cs.ukc.ac.uk/events/ismm2000

ISMM is a forum for research in memory management, in all its diversity. Areas of interest include but are not limited to: garbage collection, dynamic storage allocation, storage management implementation techniques and their interactions with languages and operating systems, and empirical studies of programs’ memory allocation and referencing behavior. The technical program for ISMM 2000 will consist of invited lectures, and presentations of both short and full-length refereed papers.

ISMM 2000 continues the tradition of the successful conference series established with the International Workshops on Memory Management held in 1992 (St. Malo, France) and 1995 (Kinross, Scotland), and the inaugural ISMM in 1998 (Vancouver, Canada). Proceedings of the IWMM conferences are available from Springer-Verlag (Lecture Notes in Computer Science no. 637 and no. 986), while the ISMM’98 proceedings were published by the Association for Computing Machinery (ACM). The 2000 Symposium Proceedings will also be published by the ACM.

The advance program and registration information for ISMM 2000 will be available in July on the ISMM 2000 web-site (http://www.cs.ukc.ac.uk/events/ismm2000).

Program Chair
Antony Hosking
Purdue U., USA

Program Committee
Trishul Chilimbi
Microsoft Research, USA
Bart Demoen
Katholieke U. Leuven, Belgium
David Detlefs
Sun Microsystems Labs., USA
Eric Jul
U. Copenhagen, Denmark
Greg Morrisett
Cornell U., USA
Scott Nettles
U. Texas at Austin, USA
Marc Shapiro
Microsoft Research, UK

General Chair
Craig Chambers
U. Washington, USA

Steering Committee
Hans Boehm
Hewlett-Packard, USA
Richard Jones
U. Kent at Canterbury, UK
J. Eliot B. Moss
U. Mass. at Amherst, USA
Simon Peyton Jones
Microsoft Research, UK
Ben Zorn
Microsoft Research, USA
